1. Identification of the substance and of the company

1.1 Product identifier

Product No.: 45 xx xxx
Substance name: Zinc selenide ZnSe, crystalline
EC No.: 215-259-7
REACH Registration No.: exempted from registration (Title II, Art.6, Par.1 REACH)
CAS No.: 1315-09-9

1.2 Relevant identified uses of the substance and uses advised against

Identified uses: Exceptionally as material for optical components.

1.3 Details of the supplier of the safety data sheet

KORTH KRISTALLE GMBH
Am Jägersberg 3
D-24161 Altenholz
GERMANY
Tel.: +49 (0)431 36905-0 Telefax: +49 (0)431 36905-25 E-Mail: info@korth.de

1.4 Emergency telephone number

Germany: GIFTNOTRUFZENTRALE-NORD Göttingen, 24h/7d Tel.: +49-(0)551 19 240
Switzerland: TOX INFO SUISSE Zürich, 24h Tel.: +41 44 251 51 51 (for Swiss: 145)

2. Hazards identification

2.1 Classification of the substance

2.1.1 According to Regulation (EC) 1272/2008 (CLP)

Classification: Acute toxicity oral Category 3 H301
Classification: Acute toxicity inhalation Category 3 H331
Classification: Specific target organ toxicity after repeated exposure Category 2 H373
Classification: Hazardous to the aquatic environment, acute Category 1 H400
Classification: Hazardous to the aquatic environment, chronic Category 1 H410

2.1.2 Additional information

EUH032 Contact with acids liberates very toxic gases.

2.2 Label elements

Hazard pictograms:
Signal word:
Hazard statements: H301 Toxic if swallowed.
H331 Toxic if inhaled.
H373 May cause damage to organs through prolonged or repeated exposure.
H410 Very toxic to aquatic life with long lasting effects.
Precautionary statements: P260 Do not breathe dust/fume/vapours/gas/mist/sprays.
P264 Wash hands and skin thoroughly after handling.
P270 Do not eat, drink or smoke when using this product.
P273 Avoid release to the environment.
P301+P310 IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.
P304+P312 IF INHALED: Call a POISON CENTER or doctor/physician if you feel unwell.
2.3 Other hazards

Possibility of liberation of very toxic gas dihydrogen selenide H$_2$Se by the reaction of the substance with acids. The substance meets not the criteria for vPvB according to Annex XIII of the Regulation (EC) Nr.1907/2006 REACH.

The substance is not listed as substance of very high concern (SVHC) according to Annex XIV of the Regulation (EC) Nr.1907/2006 REACH.

The substance is listed as dangerous substance according Annex VI, Table 3.1 of the Regulation (EC) Nr.1272/2008 CLP-GHS.

3. Composition / information on ingredients

4. First aid measures

4.1 Description of first aid measures

- **General notes:** Consult doctor in event of any complaints.
- **Following inhalation:** Change location to fresh air. Consult a doctor.
- **Following skin contact:** Remove contaminated clothing and put it in a tight closing box. Wash off contacted area with plenty soap and water. Consult a doctor.
- **Following eye contact:** Rinse the open eye with ample streaming water. Consult an eye doctor for additional treatment.
- **Following ingestion:** Rinse mouth, spoiling the liquid and give the person 2 cups water to drink, if not unconscious. Call a doctor.
- **Self-protection of first aider:** Suitable for avoiding contact with the substance.

4.2 Most important symptoms and effects, both acute and delayed

Eye burning, scraping of skin (dermatitis) after prolonged contact, metallic taste and flowing cold (“Selenium cold”), cough and scrape in the neck after inhalation, sickness up to vomiting, dizziness, headache, forming of oedema of lungs, disturbance of the central nerve system, cardiac arrhythmia, damage of liver and kidney possible.

4.3 Indication of any immediate medical attention and special treatment needed

In case of ingestion creation of very toxic dihydrogene selenide in the stomach probable. Intoxication by selenium probably recognizable by metallic taste and garlic like smell of the breathable air. Application of BAL (*British Anti-Lewisite*: Dimercaprol) and Ca-EDTA as agents for detoxication not suited. Prophylaxis for oedema of lungs with glucocorticoids advised.

5. Firefighting measures

5.1 Extinguishing media

- **Suitable media:** Spray water, foam, carbon dioxide (CO$_2$), powder. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
- **Unsuitable media:** none

5.2 Special hazards arising from the substance

- **Hazardous combustion products:** For temperatures >400°C creation of toxic/corrosive vapour of Zn, ZnO, Se, SeO$_2$, H$_2$Se (zinc, zinc oxide, selenium, selenium dioxide, dihydrogene selenide) possible.
5.3 Advise for firefighters

Usage of self-contained breathing apparatus is necessary. Wear suitable protective clothing and avoid contact with skin. Suppress (knock down) gases/vapours/mists with a water spray jet. Prevent fire extinguishing water from contaminating surface water or the ground water system.

6. Accidental release measure

6.1 Personal precautions, protective equipment and emergency procedures

6.1.1 For non-emergency personnel

Protective equipment: Suitable protective clothing and equipment.
Emergency procedures: Avoid generation and inhalation of dusts (dust respirator). Take care for appropriate fresh air. Avoid contact to eyes and skin.

6.1.2 For emergency responders

Use gloves for chemicals, e.g. PVA.

6.2 Environmental precautions

In the event of substance entering waters, canalization, or soil inform the administrative.

6.3 Methods and material for containment and cleaning up

6.3.1 For containment: Take up immediately and store in a tight closing box with labelling.
6.3.2 For cleaning up: Take up dry. Avoid generation of dust. Clean up with water.
6.3.3 Other information: none

6.4 Reference to other sections

Protective clothing according to CHAPTER 8, disposal according to CHAPTER 13.

7. Handling and storage

7.1 Precautions for safe handling

Protective measures: Follow common safety and hygiene statements.
Measures to prevent fire: Keep away from heat sources.
Measures to prevent aerosol and dust generation: Shelter from mechanical damage. Avoid generation of dust. In the case of dust generating work exhaustion system necessary.
Measures to protect the environment: Remaining material should be collected in a container.
Advice on general occupational hygiene: Rinse off hands thoroughly after contact.

7.2 Conditions for safe storage, including any incompatibilities

Technical measures and storage conditions: Only for people with expert knowledge. Keep away from food. Do not store together with acids and strong bases.
Packing materials: Not critical.
Requirements for storage rooms and vessels: Keep at dry, cool, well-ventilated place. The container should be kept tight closed and wear a label.

Storage class (VCI): 6.1D: Not combustible, acutely toxic cat.3 or chronic effects.

Further information: none

7.3 Specific end uses

Optical material exclusive for the manufacture of optical components.
8. Exposure controls / personal protection

8.1 Control parameters

Comments

¹¹ no data available
8.2 Exposure controls

8.2.1 Appropriate engineering tools

Substance related measures during identified uses: Just keep the necessary quantity at the working bench.
Organisational measures: Annual instruction of workers. No violation of limit values. Pay attention to the administrative restrictions of employment of young people and pregnant workers.
Technical measures: Take care for appropriate fresh air or exhaustion system.

8.2.2 Personal protection equipment (PPE)

Eye and face protection: Safety glasses.
Hand and skin protection: Tight closing protective clothing. Gloves made of e.g. PVA. Remember skin care.
Respiratory protection: Protective devices required when dusts are generated. For short term dust generation breathing filter. For high concentration of dust usage of kombi filter (type B-P3, colour code: grey-white) is necessary.
Thermal hazards: not true

8.2.3 Environmental exposure controls

Substance related measures: Just keep the necessary quantity at the place of usage.
Instruction measures: Avoid entering the canalization. Use collection containers.
Organisational measures: Place the collection container at the place of usage.
Technical measures: No drain at the place of usage.

9. Physical and chemical properties

9.1 Information on basic physical and chemical properties

a) Appearance: reddish/yellow, geometrical body
b) Odour: without
c) Odour threshold: not true
d) pH: unknown
e) Melting point/freezing point: 1.526°C
f) Initial boiling point and boiling range: unknown
g) Flash point: not true
h) Evaporation rate: practically not existing (25°C)
i) Flammability (solid, gas): not flammable
j) Upper/lower flammability or explosive limits: not true
k) Vapour pressure: practically not existing (25°C)
l) Vapour density: unknown
m) Relative density: 5.3 g/cm³ (20 °C)

n) Solubility(ies):
   - Practically insoluble in water (25°C)
o) Partition coefficient: n-octanol/water unknown

n) Solubility(ies):
   - Practically insoluble in water (25°C)
o) Partition coefficient: n-octanol/water unknown
9.2 Other information

Over 300°C becoming oxidized.

10. Stability and reactivity

10.1 Reactivity: Reacts together with acids, strong bases and strong oxidizers.

10.2 Chemical stability: Stable when used and stored in accordance with this MSDS.

10.3 Possibility of hazardous reactions: Formation of gas in contact with inorganic acids.

10.4 Conditions to avoid: Acids, oxidizing substances, temperatures >700°C.

10.5 Incompatible materials: Strong inorganic acids, bases and oxidising substances.

10.6 Hazardous decomposition products: Formation of gaseous, very toxic dihydrogen selenide (H₂Se), and selenium dioxide (SeO₂).

11. Toxicological information

11.1 Information on toxicological effects

- Acute toxicity: Threshold for toxic effects: 44.5mg/m³ inhalatif for rats
- Skin corrosion/irritation: Dermatitis for prolonged contact.
- Serious eye damage/irritation: Mechanical irritation.
- Respiratory or skin sensitisation: Ticklely throat, flow cold.
- Carcinogenicity: Suspicion due to experiments with animals and high doses of selenium sulphide and sodium selenate.
- Germ cell mutagenicity: Substance specific values not available. For several selenium substances genotoxical potential proofed for high doses.
- Reproductive toxicity: Substance specific values not available. Consequences not probable when keeping the limit values.
- Summary of CMR properties: Only a very low hazard potential for low dosages.

12. Ecological information

12.1 Toxicity

Comments

¹ Study over 1-2 years ² no data available
12.2 Persistence and degradability

Abiotic degradation: unknown
Biotic degradation: unknown

12.3 Bioaccumulation potential

Partition coefficient n-octanol/water (log Kow): unknown
Bioconcentration factor (BCF): unknown

12.4 Mobility in soil

unknown

12.5 Results of PBT and vPvB assessment

Of no concern for this substance.

12.6 Other adverse effects

unknown

13. Disposal considerations

13.1 Waste treatment methods

- Precaution code according to REACH: P501 Dispose of contents/container in accordance with local/regional/national/international regulation.
- Substance disposal: Keep in original container without mixing with other waste material. Follow local resp. national safety regulations and rules for disposal of dangerous substances.
- Packaging disposal: Contaminated packaging should be handled like the substance. Decontaminated container can be put in the refuse.
- Waste code according to LoW: 16 03 03 inorganic wastes containing dangerous substances 15 01 10 packaging containing residues of or contaminated by dangerous substances
- Other disposal recommendations: Residues should not be disposed of over drainage.

14. Transport information

14.1 UN number: 3283

14.2 UN proper shipping name: SELENIUM COMPOUNDS, SOLID, N.O.S. (Zinc selenide)

14.3 Transport hazard class(es): 6.1 (Poisonous substance)

14.4 Packing group: II (Medium danger)

14.5 Environmental hazards: Marine pollutant.

14.6 Special precautions for user: none

14.7 Transport in bulk according to Annex II of MARPOL / IBC code: no data
15. Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance

**EU Regulations**
- REACH Regulation 1907/2006, Art.57: no substance of very high concern, not listed in SVHC register
- SEVESO3 Directive 2012/18/EC: Appendix I, tabl.1, par. H2 Acute toxic cat.2-3 col.2/3 → 50/200t
  Appendix I, tabl.1, par. E1 Hazardous to the aquatic environment col.2/3 → 100/200t
- RoHS Directive 2011/65/EC: not listed in the substance list
- Limitations of employment: pay attention to protection of young people at work (Directive 94/33/EC)
  pay attention to safety and health at work of pregnant workers (Directive 92/85/EEC)

**National Regulations**
- **GERMANY**
  - Wassergefährdungsklasse WGK: WGK 3 ⇒ very dangerous for water
  - Technische Anleitung Luft (TA-Luft): all dust inorganic substances, class II: max. 2,5g Se/h or 0,5mg Se/m³
  - Störfallverordnung (12.BImSchV): cf. SEVESO3 EC Directive

  Limitations of employment:
  - Directive 94/33/EC for protection of young people at work
  - Directive 92/85/EEC for safety and health at work of pregnant workers
  - Education with dangerous substances at school:
    - (DGUV-Regel_113_018+019): ZnSe not listed, but handling of Se and SeO₂ prohibited for pupils in the first 4 school years

**None-EC Regulations/Databases for chemicals**
