Service-friendly maintenance of progressive cavity pumps without removing from the pipework:

FSIP®

Full Service in Place

NPS - 317 - 02 - 12/15 - 01 - Technical specifications are subject to change.

NETZSCH

How does it work?

Utilize your next maintenance period to upgrade your pump

This are your advantages:

No dis-assembling of the pump from the pipeline

Easier access to all rotating parts

Reduced maintenance through cartridge joint and mechanical seal

Reduced downtime and the associated costs

No additional pipe section necessary for dis-assembling the stator

"Ask for our modification sets or buy into the new FSIP-modular technology."

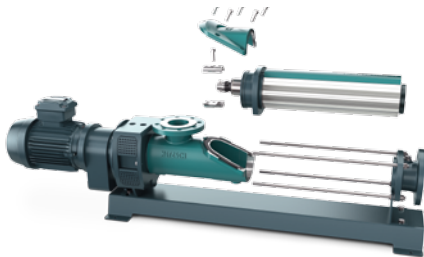

1 FSIP.ready

iFD-Stator® and pump housing with inspection opening for convenient access to all rotating parts

2 FSIP.advanced

split coupling rod for easy rotor-/stator change

3 FSIP.pro

with a cartridge mechanical seal and a cartridge joint at the rotor for the complete replacement of all rotating parts.
