

# Short User's Guide for NETZSCH Instrument Cockpit

## Install NETZSCH Proteus Software

1. *Installation:* install the NETZSCH Proteus software version 6.1 or later on the measurement computer and restart it.
2. *First Connection:* start the measurement component of the software. It is usually called as your instrument name like "DSC 204 F1". The software will establish the first connection with your NETZSCH instrument. When the connection is established – the remote access will be also configured for this instrument.
3. *Repeat* the Step 2 for all your new NETZSCH instruments.

## Install NETZSCH Instrument Cockpit App

Please download and install the Instrument Cockpit Apps for the platform you need:

- Microsoft Windows:  
<http://www.netzsch.com/n24660>
- iPad and iPhone (Apple iOS)  
<http://www.netzsch.com/n80379>
- Android:  
[www.netzsch.com/n24880](http://www.netzsch.com/n24880)

## Connect App to the NETZSCH Instruments

### Windows PC: LAN (or WLAN)

The measurement computer with NETZSCH instrument must be connected to the LAN (or WLAN).

PC with Instrument Cockpit for Windows must be connected to the same LAN (or WLAN) as the measurement computer.

Start Instrument Cockpit for Windows and search for NETZSCH instruments.

### iPAD or Android: WLAN

iPad, iPhone or Android devices can get connected to the NETZSCH instruments only via WLAN. A wireless access point or wireless router connected to your LAN is needed. Please ask your network administrator for details.

Connect your device (with installed NETZSCH Instrument Cockpit) to the WLAN access point or router.

Start Instrument Cockpit app and search for NETZSCH instruments.

## VPN for mobile data network

Devices with SIM card like smartphones or tablets can get information from NETZSCH instruments via VPN (Virtual Private Network) through mobile data connection. In this case it will be possible to see the state of NETZSCH instruments almost anywhere – where you get mobile data connection from the mobile provider. Please ask network administrator for details about VPN.

**IMPORTANT:** when using Search in Instrument Cockpit through VPN connection full qualified name of at least one computer attached to NETZSCH instrument must be known. This computer name must be entered into the search textbox of the Instrument Cockpit app. Search for the NETZSCH instruments without provided computer name will not found any instrument.
